Evolution, Bacteria, and Viruses study guide ;) - Biology ...

Viruses that specifically infect bacteria and archaea (the other two domains of life) are called phages (either shortened for bacteriophage or archaeophage). Phage comes from the Greek word for "devour." For example, "I am so hungry, I could phage an adult badger." Phages have been known for centuries to prevent bacterial disease.

Phages | Shmoop

It is estimated that at least 100 trillion (10^{14}) microbial cells and millions of viruses reside within the human body, all of which produce various enzymes, chemicals, hormones, and vitamins ...
