Servo Drives and Motors The Lexium servo drives and motors portfolio includes a wide variety of ranges with a power range up to 24 kW for independent or synchronized motion control. Lexium products can adapt to demand for high performance, power and simplicity of use in motion control applications.

Servo Drives and Motors | Schneider Electric Global

The Lexium 32 product range of servo drives includes 4 servo drive models and 2 servo motor ranges that provide high performance, power , and simplicity of use in motion control applications . This product range covers power ratings from 0 .15 to 11 kW . This Lexium 32 servo drive product offer is designed to extend the life cycle of machines .

Schneider Electric 32 Servo Drives Motion control

Servo Drives. A servo drive can also be termed as an amplifier due to its ability to take the control signals from all the controllers and escalates it to give out a certain amount of the voltage and current of the motor. Servo drives are applied in functions such as robotics, automation, CNC machining, and even in the processes of ...
